The following questions are designed to help you assess your comfort level with general data analytics principles and data types. Use them to self-reflect and make your own decisions about the foundational knowledge you need to be successful in this course.

1.	what is data science?	1/1คะแนน
	A field of study that uses raw data to create new ways of modeling and understanding the unknown	
	A process used to solve complex problems in a user-centric way	
	A tool for organizing data elements and how they relate to one another	
	O The collection, transformation, and organization of data in order to draw conclusions, make predictions,	
	and drive informed decision-making	
	্ত ৭০৪০০ Data science is a field of study that uses raw data to create new ways of modeling and understanding the unknown.	
2.	What is the key difference between qualitative and quantitative data?	1/1คะแนน
	 Qualitative data describes the kind of data being analyzed; quantitative data describes how much data is being analyzed. 	
	 Qualitative data is about the quality of a product or service; quantitative data is about how much of that product or service is available in the marketplace. 	
	 Qualitative data measures qualities and characteristics; quantitative data measures numerical facts. 	
	Qualitative data is subjective; quantitative data is specific.	
	🕑 वृत्तबंबर Qualitative data measures qualities and characteristics; quantitative data measures numerical facts.	
3.	Which of the following statements accurately describe wide and long data? Select all that apply.	1 / 1 คะแนน
	✓ Long data subjects can have multiple rows that hold the values of subject attributes.	
	্	
	☐ Wide data subjects can have multiple rows that hold the values of subject attributes.	
	☐ Long data subjects can have data in multiple columns.	
	Wide data subjects can have data in multiple columns.	
	(c) quãos Wide data subjects can have data in multiple columns. Long data subjects can have multiple rows that hold the values of subject attributes.	
4.	Structured data is likely to be found in which of the following formats? Select all that apply.	1/1คะแนน
	✓ Database table	
	 qnañav Structured data is organized in a certain format such as rows and columns. It is likely to be found in a table or spreadsheet. To learn about structured data, review course three of the Google Data Analytics Certificate. 	
	☑ Spreadsheet	
	• nnãas Structured data is organized in a certain format such as rows and columns. It is likely to be found in a table or spreadsheet. To learn about structured data, enroll in the Google Data Analytics Certificate.	
	□ Digital photo □ Audio file	
5.	Fill in the blank: A Boolean data type can have possible value(s).	1/1คะแนน
	O three	
	● two	
	One	
	infinite	
	🚫 वृ กตัอง A Boolean data type can have two possible values.	

The following questions are designed to help you assess your comfort level with data strategy. Use them to self-reflect and make your own decisions about the foundational knowledge you need to be successful in this course.

5.	What is the term for the individuals who have invested time and resources in a project and are interested in outcome?	its 0/1 คะแนน
	O Project sponsors	
	O Subject-matter experts	
	Executives Stakeholders	
	An Stakeholders are individuals who have invested time and resources in a project and are interested in it.	ts
	outcome. To learn about stakeholders, enroll in the Google Data Analytics Certificate.	
7.	When collecting data for a study, what are some reasons to consider sample size? Select all that apply.	1 / 1 คะแนน
	✓ To collect data that represents a diverse set of perspectives	
	বুনাৰ্জ্য Considering sample size ensures the data represents a diverse set of perspectives and helps avoid ske results or inaccurate judgements.	wed
	✓ To make sure a few unusual responses don't skew results	
	 Qndas Considering sample size ensures the data represents a diverse set of perspectives and helps avoid ske results or inaccurate judgements. 	wed
	☐ To include as many participants as possible in the study	
	☐ To eliminate certain segments of a population	
в.	The SMART methodology can be used to ask a question that promotes change. What type of SMART question leads to change?	0 / 1 คะแนน
	Transformational	
	Motivational Action-oriented	
	Results-focused	
	As MART question that promotes change is action-oriented. To learn about SMART questions, enroll in Google Data Analytics Certificate.	n the
э.	Which of the following inquiries are leading questions? Select all that apply.	1 / 1 คะแนน
	☐ How did you learn about our company?	
	✓ How satisfied were you with our customer representative?	
	् शूतबंबर Leading questions include: How satisfied were you with our customer representative? In what ways di	d
	our product meet your needs? And what do you enjoy most about our service? Leading questions dire the respondent to a particular answer, often because they suggest the answer within the question.	
	✓ What do you enjoy most about our service?	
	• qniaa Leading questions include: How satisfied were you with our customer representative? In what ways di our product meet your needs? And what do you enjoy most about our service? Leading questions do: the product meet your needs? And what do you enjoy most about our service? Leading questions do:	
	the respondent to a particular answer, often because they suggest the answer within the question.	
	In what ways did our product meet your needs?	
	Qnāaa Leading questions include: How satisfied were you with our customer representative? In what ways di our product meet your needs? And what do you enjoy most about our service? Leading questions dire the respondent to a particular answer, often because they suggest the answer within the question.	
10	b. What are the key characteristics of a metric? Select all that apply.	0.75 / 1 คะแนน
	✓ Metrics can be used to evaluate performance.	
	 ⊙ ถูกผัลง Metrics are quantifiable data types used for measurement and performance evaluation. 	
	☐ Metrics are unorganized collections of facts.	
	☐ Metrics are used for measurement.	
	Metrics are quantifiable.	
	Metrics are quantifiable. one quantifiable one quantifiable data types used for measurement and performance evaluation.	
	⊙ ถูกต้อง	
	্ ৭ুনর্জ্বত্ত Metrics are quantifiable data types used for measurement and performance evaluation.	

The following questions are designed to help you assess your comfort level with data integrity and data cleaning. Use them to self-reflect and make your own decisions about the foundational knowledge you need to be successful in this course.

Observer bias	
Interpretation bias	
O Cultural bias	
⊙ ถูกต้อง	
Interpretation bias is the tendency to construe ambiguous situations in a positive or negative way.	
2. Before completing a survey, an individual acknowledges reading information about how and why the data they provide will be used. What concept does this describe?	1/1คะแน
O Privacy	
Transaction transparency	
© Consent	
Openness	
ั ดูกตัลง This concept is called consent. Consent is the aspect of data ethics that presumes an individual's right to	
know how and why their personal data will be used before agreeing to provide it.	
3. Which spreadsheet tool changes how cells appear when values meet a specific condition?	1 / 1 คะแน
O Data validation	
Conditional formatting Alternating colors	
Protected ranges	
 ดูกต้อง	
Conditional formatting is the spreadsheet tool that changes how cells appear when values meet a specific condition.	
 Fill in the blank: In a spreadsheet, the SPLIT function divides a text string around a, then puts each fragmen 	1/1คะแน
into a new, separate cell.	
delimiter	
mark indicator	
Substring	
 ถูกต้อง	
In a spreadsheet, the SPLIT function divides a text string around a delimiter, then puts each fragment into a new, separate cell.

What are the main benefits of using a programming language to work with data? Select all that apply. Save time negair infrastructure negair i	1/1 өгин

17. In order for code to work properly, it's necessary to follow the predetermined structure of the coding language.
This includes all required words and symbols, as well as their proper placement. What is this structure called?

1 / 1 คะแนน

○ Symbol	
• gnãas In order for code to work properly, it's necessary to follow the syntax of the coding language. This includant all required words and symbols, as well as their proper placement.	des
18. What is the term for programming code that is freely available and may be modified and shared by the people who use it?	1/1 คะแนก
O Non-dependant	
O Common-design	
Open-source	
One-access	
○ กุกตัอง Open-source code is freely available and may be modified and shared by the people who use it.	
9. Data professionals use programming languages to enable which of the following? Select all that apply.	0 / 1 คะแนน
☐ Data cleaning	
☑ Data governance	
(S) "tianstifiandstif Data professionals use programming languages to enable data transformation, cleaning, and visualization. To learn about programming languages, enroll in the Google Data Analytics Certificate.	
☑ Data visualization	
 ั จุกต้อง Data professionals use programming languages to enable data transformation, cleaning, and visualization. 	
✓ Data transformation	
ั จุกคัลง Data professionals use programming languages to enable data transformation, cleaning, and visualization.	
successful in this course.	you need to be
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Orrelation chart	
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges?	
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Orrelation chart	
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges?Correlation chartTree map	
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Orrelation chart O Tree map O Bar chart	
O. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart Histogram	1/1 a eum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart In Histogram one of data visualization of demonstrate how often data values fall into certain ranges, use a histogram.	1/1 a eum
O. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart Histogram one map one map To demonstrate how often data values fall into certain ranges, use a histogram.	1/1 a eum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart Mistogram one in this of the state of the s	1/1 a eum
O. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Orrelation chart Tree map Bar chart Histogram one in data values fall into certain ranges, use a histogram. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? Scatter plot Pie chart Area chart Line chart	1/1 a eum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart Mistogram one in this of the state of the s	1/1 a eum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart In Histogram Question To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? Scatter plot Pie chart Area chart In Ine chart Question To demonstrate how the city's annual home sales have risen over time, a line chart would be most	1/1 a eum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? Correlation chart Tree map Bar chart In Histogram Question To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? Scatter plot Pie chart Area chart In Ine chart Question To demonstrate how the city's annual home sales have risen over time, a line chart would be most	1/1 acum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ② Instagram ② qnsias ○ To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ② qnsias □ To demonstrate how the city's annual home sales have risen over time, a line chart would be most effective.	1/1 acum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ○ Histogram ○ gnaisa ○ To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ○ Line chart ○ Qnaisa ○ To demonstrate how the city's annual home sales have risen over time, a line chart would be most effective.	1/1 acum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ② Instagram ② qnsias ○ To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ② qnsias □ To demonstrate how the city's annual home sales have risen over time, a line chart would be most effective.	1/1 acum
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ○ Histogram ○ gnaisa ○ To demonstrate how often data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ○ Line chart ○ union ○ gnaisa ○ To demonstrate how the city's annual home sales have risen over time, a line chart would be most effective. 12. What type of visualizations enable the data in a presentation to automatically update and change over time? ○ Discrete ○ Dynamic ○ Static	1/1 คะแบบ
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ○ Histogram ○ quisas ○ To demonstrate how often data values fall into certain ranges, use a histogram. 21. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ○ Line chart ○ unisas □ to demonstrate how the city's annual home sales have risen over time, a line chart would be most effective. 12. What type of visualizations enable the data in a presentation to automatically update and change over time? ○ Discrete ○ Dynamic ○ Static ○ Customized	1/1 คะแกน
10. What type of data visualization should be used to demonstrate how often data values fall into certain ranges? ○ Correlation chart ○ Tree map ○ Bar chart ② Inside the data values fall into certain ranges, use a histogram. 11. A dashboard is designed to share insights about the housing market in a city. What type of data visualization would be most effective at demonstrating how the city's annual home sales have risen over time? ○ Scatter plot ○ Pie chart ○ Area chart ② Inside the data ○ Union to demonstrate how the city's annual home sales have risen over time, a line chart would be most effective. 12. What type of visualizations enable the data in a presentation to automatically update and change over time? ○ Discrete ○ Dynamic ○ Static ○ Customized	1/1 คะแกน

🔽 Labels can be placed near the data, whereas legends are typically positioned away from the data.

กุศตัลง It is more effective to label a data visualization instead of using a legend for several reasons: Labels can be placed near the data, they make the data visualization more accessible, and they allow for text explanations to be placed directly on the visualization.	
✓ Labels allow for text explanations to be placed directly on the visualization.	
onais It is more effective to label a data visualization instead of using a legend for several reasons: Labels can be placed near the data, they make the data visualization more accessible, and they allow for text explanations to be placed directly on the visualization.	
■ Labels make the data visualization more accessible because they don't rely on the ability to interpret color.	
onaiou It is more effective to label a data visualization instead of using a legend for several reasons: Labels can be placed near the data, they make the data visualization more accessible, and they allow for text explanations to be placed directly on the visualization.	
4. A data visualization reveals two variables in the data that rise and fall at the same time. When variables are related in this way, what is likely happening?	1/1 คะแนน
© Correlation	
O Divergence	
O Causation	
Polarity	
15. Which of the following are appropriate uses for filters in data visualization tools? Select all that apply.	1/1คะแนน
Hiding outliers that do not support the hypothesis Highlighting individual data points	
• Qnaias Filters can be used to highlight individual data points, limit the number of rows or columns in view, and provide data to different users based on their needs.	
Providing data to different users based on their particular needs	
• nnias Filters can be used to highlight individual data points, limit the number of rows or columns in view, and provide data to different users based on their needs.	
Limiting the number of rows or columns in view	
 จูกต้อง Filters can be used to highlight individual data points, limit the number of rows or columns in view, and provide data to different users based on their needs.
